

Draft AUCDI R1 for comment

Sparked is seeking feedback on the following areas

1. Suggestions for improvement in the data groups or elements in Draft AUCDI R1, including Data groups and data element definitions and examples of code sets used by vendors and implementers to communicate data element scope
 1. is the clinical content is correct e.g. data element names and descriptions,
 2. is the metadata is appropriate e.g. use and misuse
 3. is there anything missing or inappropriate?
 4. are there issues with the use of terminology (code system and value set) of the data elements
2. Suggestions for additional data elements that are not yet in the backlog and why?
3. Are there significant barriers to development, implementation, or use for any of these data elements in Draft AUCDI R1 that warrant a change in definition, or removal?
4. Suggestions around additional use cases and data groups/elements to support those use cases to go on our roadmap
5. General feedback on the document including
 - additional references
 - additional information to provide greater clarity or context around the AUCDI and its use
 - additional national standards and initiatives we should be considering

Feedback guidelines

- For changes and new content requests to the AUCDI content, please provide clear justification, use cases and references - providing more detail will assist the Sparked team in understanding the nature and context of your requirements. The justification will also aid in assessing the risks and benefits that are associated with making the change.
 - If there are similar data elements available already, please provide justification

why a new suggested data element is required and the use cases that it supports

- For each data group, please provide an overall recommendation
 - If your answer is "Major revision" or "Reject", please make sure you let us know why in the feedback sections

Sparked welcomes information that identifies the healthcare community's preferences and priorities for informing further investigation.

Target audience of review: Reviews are accepted from all interested stakeholders. Digital health or clinical expertise is not required to provide comments - we encourage contributions from all unique points of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background.

Draft AUCDI R1 is open for feedback until Friday 8 March 2024. COP

Reviewer Details

1

Is this submission *

- Group submission
- Individual submission

2

Which organisation are you submitting on behalf of?

3

Full name *

4

Email *

5

Organisation *

6

Role title *

7

Which of the following stakeholder categories best describes you/your organisation *

- Health or care provider
- Software vendor
- Government
- University/Academic
- Consultancy
- Consumer advocacy
- Other

8

I acknowledge that submitting feedback through this form indicates that I have read and understand the information sheet linked here <https://confluence.csiro.au/display/FHIR/How+to+Register+-+Participant+Information>, that I may withdraw from participation at any time, and that my contributions may be recorded on the publicly available Confluence site and used to inform program outcomes.
If you don't agree then please close now and no information will be recorded. *

- Yes

Feedback form

Please provide your feedback in the form below. You can save and edit your responses before the end of the feedback cycle.

Thank you for your time.

9

Do you have any general feedback? Specific feedback for data groups and elements can be provided in later questions. *

This include

- additional references
- additional information to provide greater clarity or context around the AUCDI and its use
- additional national standards and initiatives we should be considering

Yes

No

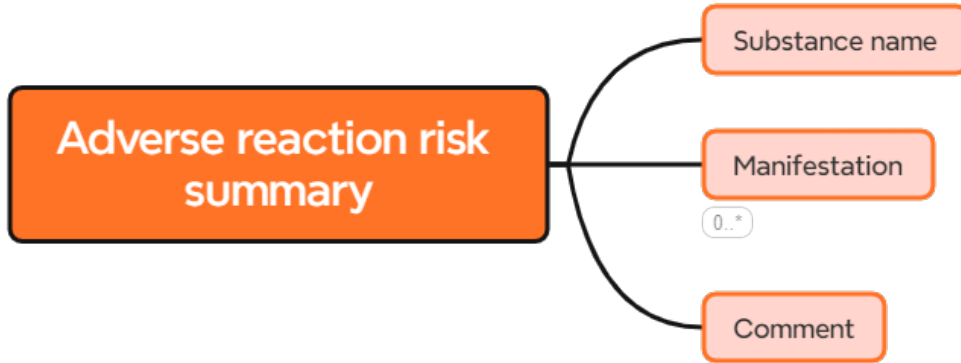

10

Please provide your general feedback

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

11

Do you have feedback for "Adverse reaction risk" data group *

Yes

No

12

Data element: Substance name

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

13

Data element: Manifestation/s

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

14

Data element: Comment

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

15

General feedback for "Adverse reaction risk"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

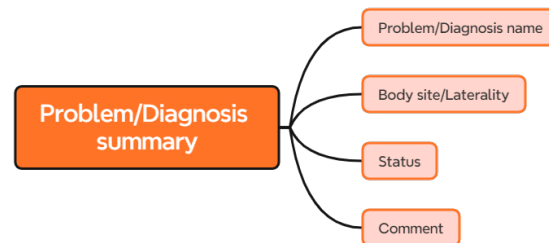

16

Overall recommendation *

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

17

Do you have feedback for "Problem/Diagnosis" data group *

- Yes
- No

18

Data element: Problem/Diagnosis name

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

19

Data element: Body site/laterality

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

20

Data element: Status

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

21

Data element: Comment

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

22

General feedback for "Problem/Diagnosis"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

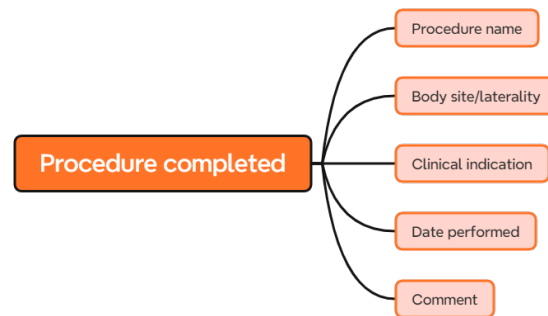

23

Overall recommendation *

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

24

Do you have feedback for "Procedure completed" data group *

- Yes
- No

25

Data element: Procedure name

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

26

Data element: Body site/laterality

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

27

Data element: Clinical indication

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

28

Data element: Data performed

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

29

Data element: Comment

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

30

General feedback for "Procedure completed"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

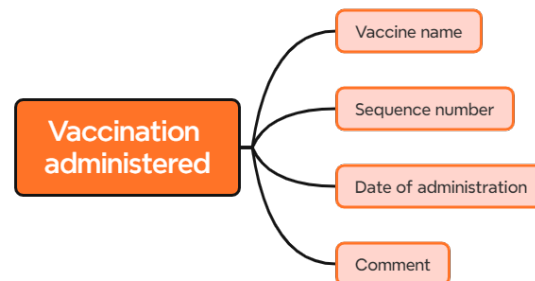

31

Overall recommendation *

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

32

Do you have feedback for "Vaccination administered event" data group? *

- Yes
- No

33

Data element: Vaccine name

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

34

Data element: Sequence

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

35

Data element: Date of administration

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

36

Data element: Comment

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

37

General feedback for "Vaccination administered"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

38

Overall recommendation *

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

39

Do you have feedback for "Tobacco smoking summary" data group? *

Yes

No

40

Data element: Overall status

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

41

General feedback for "Tobacco smoking summary"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

42

Overall recommendation *

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

43

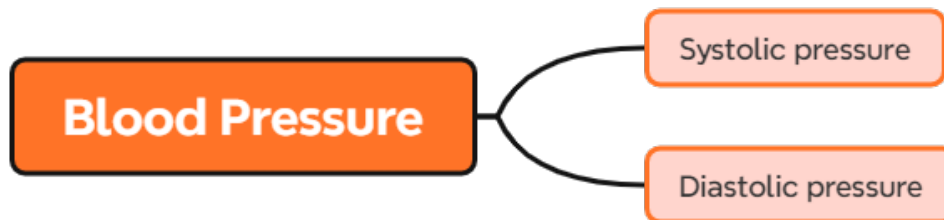

Do you have feedback for "Measurement and vital signs" data groups? *

Yes

No

44

Do you have feedback for "Blood pressure" data group?

Yes

No

45

Data element: Systolic pressure

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

46

Data element: Diastolic pressure

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

47

General feedback for "Blood pressure"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

48

Do you have feedback for "Pulse information" data group?

Yes

No

49

Data element: Rate

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

50

General feedback for "Pulse information"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

51

Do you have feedback for "Body temperature" data group?

 Yes No

52

Data element: Temperature

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

53

General feedback for "Body temperature"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

54

Do you have feedback for "Respiration information" data group?

Yes

No

55

Data element: Rate

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

56

General feedback for "Respiration information"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

57

Do you have feedback for "Body height" data group?

 Yes No

58

Data element: Height/length

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

59

General feedback for "Body height"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

60

Do you have feedback for "Body weight" data group?

Yes

No

61

Date element: Body weight

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

62

General feedback on "Body weight"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

63

Do you have feedback on "Waist circumference" data group?

Yes

No

64

Data element for Waist circumference

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

65

General feedback for "Waist circumference"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

66

General feedback for "Measurements and vital signs"?

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

67

Overall recommendation *

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

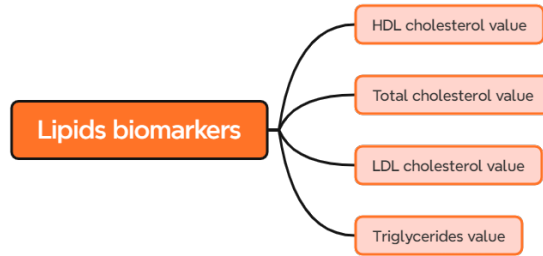

68

Do you have feedback for "Biomarkers"? *

- Yes
- No

69

Do you have feedback for "Lipids" data group?

Yes

No

70

Data element: HDL cholesterol

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

71

Data element: LDL cholesterol

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

72

Data element: Total cholesterol

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

73

Data element: Triglycerides

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

74

General feedback for "Lipids"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

75

Do you have feedback for "Haemoglobin A1c" data group?

Yes

No

76

Data element: HbA1c

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

77

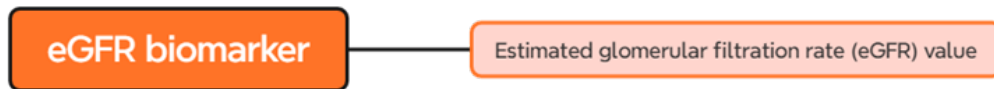

General feedback for "Haemoglobin A1c"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

78

Do you have feedback for "Estimated glomerular filtration rate" data group?

 Yes No

79

Data element: eGFR

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

80

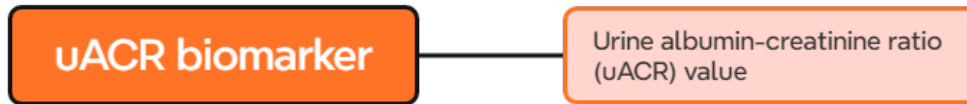

General feedback for "Estimated glomerular filtration rate"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

81

Do you have feedback for "Urine albumin-creatinine" data group?

Yes

No

82

Data element: uACR

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

83

General feedback for "Urine albumin-creatinine" data group

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

84

General feedback for "Biomarkers"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

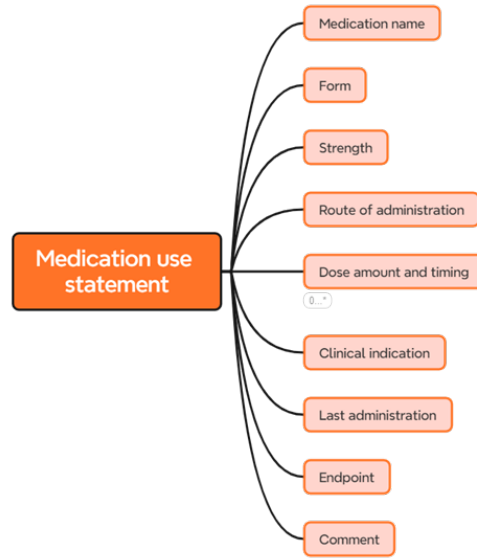

85

Overall recommendation *

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

86

Do you have feedback for "Medication use statement" data group? *

Yes

No

87

Data element: Medication name

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

88

Data element: Form

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

89

Data element: Strength

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

90

Data element: Route of administration

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

91

Data element: Dose amount and timing

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

92

Data element: Clinical indication

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

93

Data element: Last administration

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

94

Data element: Endpoint

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

95

Data element: Comment

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

96

General feedback for "Medication use statement"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

97

Overall recommendation *

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

98

Do you have feedback for "Encounter - clinical context" data group? *

- Yes
- No

99

Data element: Reason for encounter

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

100

Data element: Modality

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

101

General feedback for "Encounter - Clinical Context"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

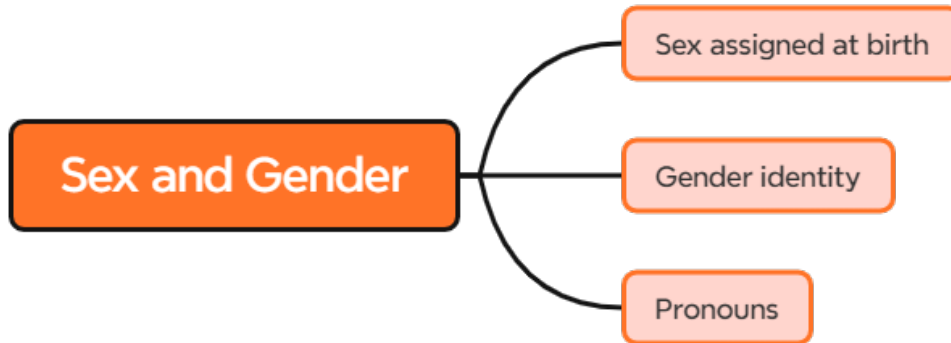

102

Overall recommendation *

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

103

Do you have feedback for "Sex and Gender" data group? *

Yes

No

104

Data element: Sex assigned at birth

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

105

Data element: Gender identity

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

106

Data element: Pronouns

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

107

General feedback for "Sex and gender"

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

108

Overall recommendation *

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

109

Any other feedback?

Thank you for your feedback
