Sparked Summary Status

Report Date:	26 March 2024	Program Status:	Green
Report Period:	March 2024	Program Phase:	Operations

Status Summary

The Sparked Program's Operations Phase is progressing well, with the recent HL7 AU/NZ Symposium and Connectathon events in March enhancing connectivity and collaboration among organisations. The Draft for Community Comment on the AU Core Data for Interoperability R1 has received a spirited response, with over 50 contributions now under review. Development efforts continue on the AU eRequesting Data for Interoperability, with the Clinical Data Group engaging effectively through online and in-person forums. Continuous progress is being made in the Pathology and Radiology Referral ValueSet/s with a focus on completing Ways of Working. Regular meetings of the Sparked AU Core and AU eRequesting Technical Development Groups ensure sustained development. As the ballot period for the AU Core Draft for Comment R1 Ballot phase concludes in early April, our attention is pivoting to the feedback review process. Infrastructure to support the Validation Piloting of the AU Core is being actively developed, with testing resources available in Inferno. Looking forward, our focus will be on resolving feedback from the AU Core Ballot, executing validation pilots, pushing forward with AUeReqDI development, and organising the May face-to-face meetings

Product Status: Pathology Request ValueSet/s

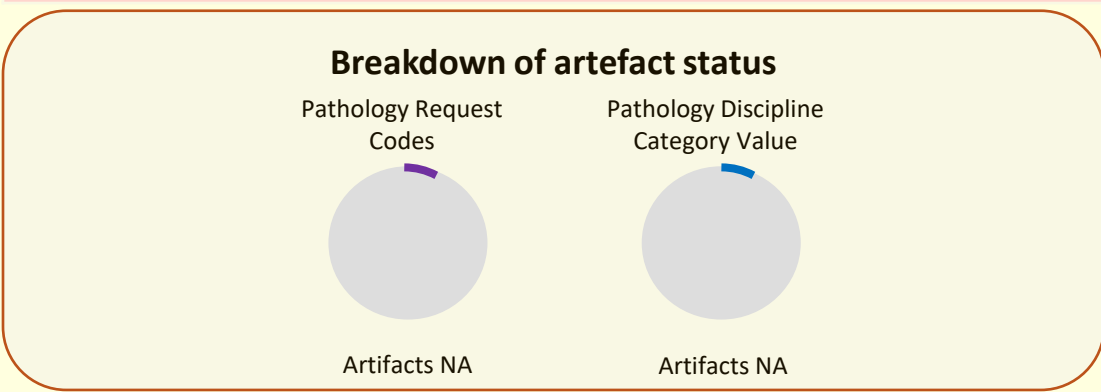

Report Date:	26 March 2024
Report Period:	March 2024

Product Definition

Published SNOMED CT ValueSet/s to support the standardised, electronic requesting of Pathology tests guided by the professional peak body, Royal College of Pathologists of Australasia (RCPA) for implementing across Australia.

Dependencies

NA

Risk/Issues Mitigation Plan

Risk 13 - Delays in finalising ways of working
Mitigation: Continue development of products to limit impact on program delivery
Residual Risk Rating: Low – Limited impact to overall product and program status.

Product Status: AU Core Reference Implementation

Report Date:	26 March 2024
Report Period:	March 2024

Product Definition

Reference implementations assist implementers to adopt the AU Core FHIR IG through:

- Provide a starting point for developers that allows them to decide how to represent AU Core FHIR objects and behaviour within their environment.
- Provide means for practical testing at Connectathons and through piloting before the FHIR IGs are finalised.

External Reference Implementations

Sparked community reference services available:
