

## AUCDI Release 2 Chronic Condition Management Component - Request for Feedback

The Draft AUCDI Release 2 Chronic Condition Management component is available at on the Sparked website

here <https://sparked.csiro.au/index.php/get-involved-with-sparked/requests-for-feedback/aucdi-r2-ccm-community-comment/>

This component version of AUCDI contains new content to allow a focused review on the requirements for Chronic Condition Management to support an iterative development process of AUCDI.

The complete AUCDI Release 2 is on track to be published in June 2025. Release 2 will contain all of the content from AUCDI Release 1, AUCDI Patient Summary Component and content from this component release.

Sparked is seeking feedback on the following areas

1. Suggestions for improvement in the new data groups or elements in AUCDI that have not been previously included in Release 1. This includes the data groups and data element definitions and examples of code sets used by vendors and implementers to communicate data element scope
  1. is the clinical content is correct (e.g. data element names and descriptions),
  2. is the metadata is appropriate (e.g. use and misuse),
  3. is there anything missing or inappropriate?
  4. are there issues with the use of terminology (code system and value set) of the data elements
2. Suggestions for additional data elements related to Patient Summary that are not yet in the backlog and why?
3. Are there significant barriers to development, implementation, or use for any of these data elements in Draft AUCDI Release 2 Patient

- summary that warrant a change in definition, or removal?
4. General feedback on the document including
- additional references
  - additional information to provide greater clarity or context around the AUCDI and its use
  - additional national standards and initiatives we should be considering

### Feedback guidelines

- For changes and new content requests to the AUCDI content, please provide clear justification, use cases and references - providing more detail will assist the Sparked team in understanding the nature and context of your requirements. The justification will also aid in assessing the risks and benefits that are associated with making the change.
  - If there are similar data elements available already, please provide justification why a new suggested data element is

6

Role title \*

7

Which of the following stakeholder categories best describes you/your organisation \*

Health or care provider

Software vendor

Government

Clinical peak body

Industry peak body

University/academic

Consultancy

Consumer advocacy

Other

8

I acknowledge that submitting feedback through this form indicates that I have read and understand the information sheet linked

here <https://sparked.csiro.au/index.php/contact-us/participant-information/>, that I may withdraw from participation at any time, and that my contributions will be published on the publicly available website and used to inform program outcomes.

If you don't agree then please close this window now and no information will be recorded. \*

Yes, I agree

## Feedback form

Please provide your feedback in the form below. You can save and edit your responses before the end of the feedback cycle.

**Note that: Review is not expected for the content that has not changed from AUCDI Release 1, or Patient Summary Components.**

In this release of AUCDI R2:

- One data group from AUeReqDI R1 has been included, unchanged:
  - Service request
- Two data groups from AUCDI R1 have been extended by the addition of new data elements which the Sparked CDG deemed necessary in the context of CCM:
  - Procedure
  - Tobacco smoking summary
- 15 new data groups have been added to support CCM and care planning:
  - Health issue
  - Goal
  - Alcohol consumption summary
  - Substance use summary
  - Interventions:
    - Health education
    - Medical equipment supply
    - Psychosocial therapy
    - Physical assistance

◦ Data groups that incorporate elements that will support Social Determinants of Health (SDOH) assessments:

- Food and nutrition summary
- Physical activity summary
- Living arrangement summary
- Occupational summary
- Education summary
- Housing summary
- Financial summary

The component version of AUCDI contains Chronic Condition Management related content to allow a focused review and support an iterative development process of AUCDI. A full AUCDI Release 2, which supersedes AUCDI R1, will be published in June 2025, containing all of the content from AUCDI R1 plus the content from this component release.

### Content in the mindmap:

- Nodes displayed as black text on an orange background and containing a green tick icon have been published in AUCDI R1,

and

- Nodes displayed as black text on a white background and containing an orange star are candidate data elements for AUCDI R2.

**Content in the tables:** Content that has not changed from AUCDI Release 1 has been marked with a grey background in the document so that it can be easily recognised by its display within tables or text boxes. Any new data elements that have been added, or supporting information that has been edited or adapted, are presented without any background colouring, distinguishing them from the unchanged content. Thank you for your thoughts and feedback.

9

Do you have any general feedback on AUCDI in the chronic condition management context? Specific feedback for data groups and elements can be provided in later questions. \*

This includes:

- additional references
- additional information to provide greater clarity or context around the AUCDI in the CCMchronic condition management context and its use
- additional national standards and initiatives we should be considering

Yes

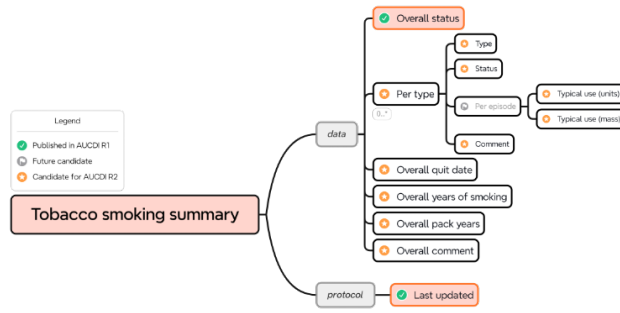

No

10

Please provide your general feedback on AUCDI in the chronic condition management context

11

Do you have feedback on the updates to Tobacco smoking summary? \*

Yes

No

12

Data element: Per type/group

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

13

Data element: Per type: type

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

14

Data element: Per type: status

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

15

Data element: Per type: episode: Typical use (units)

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

16

Data element: Per type: episode: Typical use (mass)

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

17

Data element: Per type: Comment

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

18

Data element: Overall quit date

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

19

Data element: Overall years of smoking

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

20

Data element: Overall years of smoking

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

21

Data element: Overall pack years

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

22

Data element: Overall comment

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

23

General feedback on updates to Tobacco smoking summary data group

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

24

Overall recommendation: Tobacco smoking summary data group \*

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

25

Do you have feedback on the new data group, Alcohol consumption summary? \*

Legend

---

 Candidate for AUCDI R2

**Alcohol consumption summary**

Yes

No

26

Data element: Overall status

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

27

Data element: Overall comment

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

28

Data element: Last updated

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

29

### General feedback on new data group, Alcohol consumption summary?

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

30

## Overall recommendation: Alcohol consumption summary?

\*

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

31

Do you have feedback on the new data group, Substance use summary? \*

Legend

---

 Candidate for AUCDI R2

**Substance use summary**

Yes

No

32

Data element: Substance name

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

33

Data element: Overall status

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

34

Data element: Last updated

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

35

Data element: Overall comment

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

36

General feedback on new data group, Substance use summary

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

37

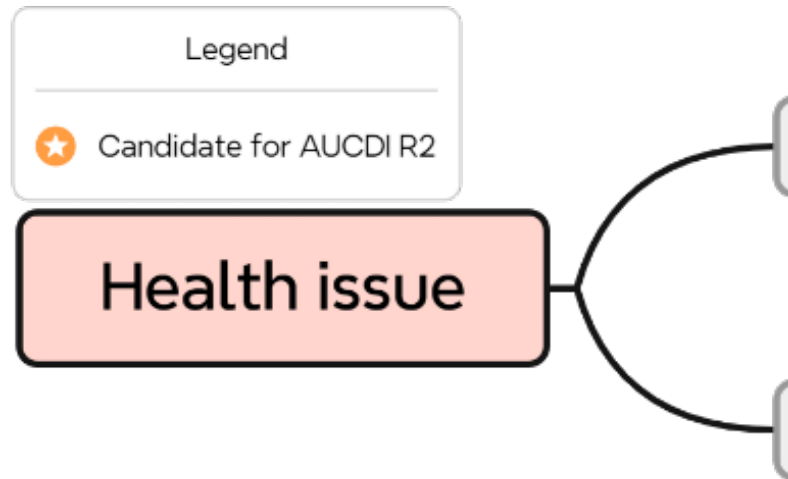

Overall recommendation: Substance use summary data group \*

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

## Health Issue and Goals

38

Do you have feedback on the new data group, Health Issue? \*

Yes

No

39

Data element: Issue name

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

40

Data element: Description

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

41

Data element: Date of onset

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

42

Data element: Last updated

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

43

General feedback on new data group, Health issue

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

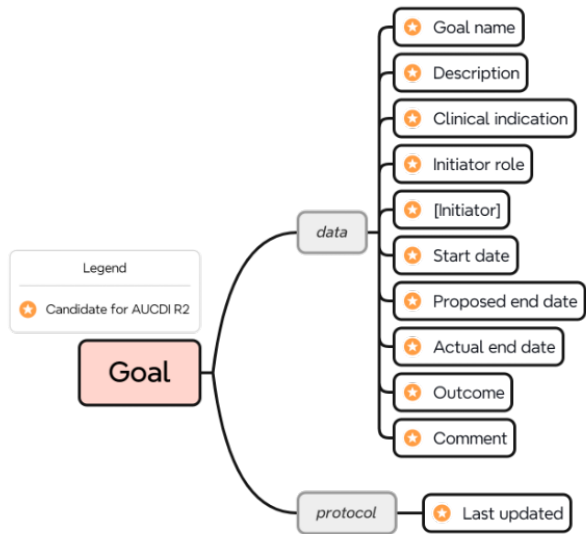

44

## Overall recommendation: Health issue data group \*

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

45

Do you have feedback on the new data group, Goal? \*

Yes

No

46

Data element: Goal name

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

47

Data element: Description

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

48

Data element: Clinical indication

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

49

Data element: Initiator role

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

50

Data element: Initiator

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

51

Data element: Start date

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

52

Data element: Proposed end date

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

53

Data element: Actual end date

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

54

Data element: Outcome

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

55

Data element: Comment

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

56

Data element: Last updated

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

57

General feedback on new data group, Goal

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

58

## Overall recommendation: Goal data group \*

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

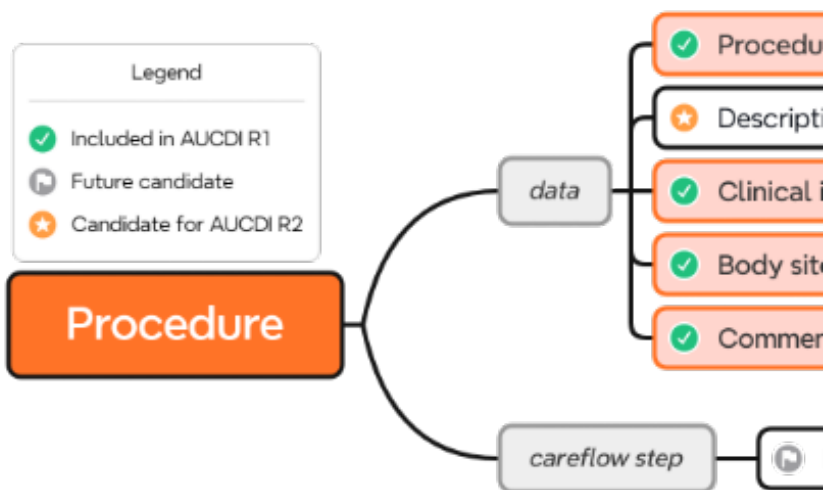

## Intervention

Definition: A single therapeutic activity, or a series of activities, intended to prevent, diagnose, treat, or manage a health condition, support mental or physical wellbeing, or address social and environmental factors that influence health outcomes.

59

Do you have feedback on the new data element in the data group Procedure? \*

Yes

No

60

### Data element: Description

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

61

### General feedback on new data element in the data group, Procedure

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

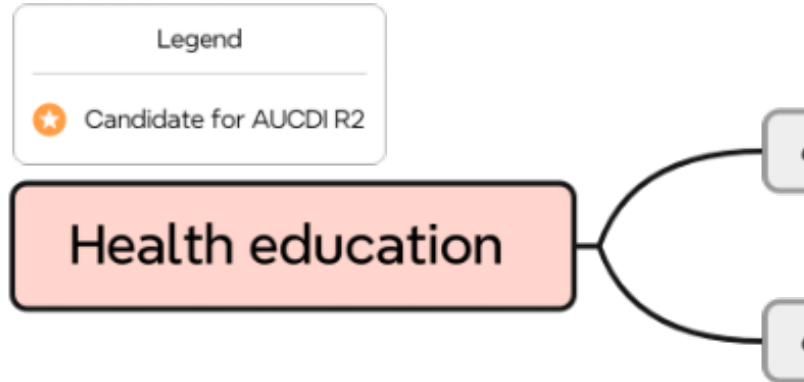

62

## Overall recommendation: updated Procedure data group \*

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

63

Do you have feedback on the new data group, Health education? \*

Yes

No

64

Data element: Education topic

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

65

Data element: Description

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

66

Data element: Date/time provided

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

67

## General feedback on new data group, Health education

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

68

## Overall recommendation: Health education data group \*

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

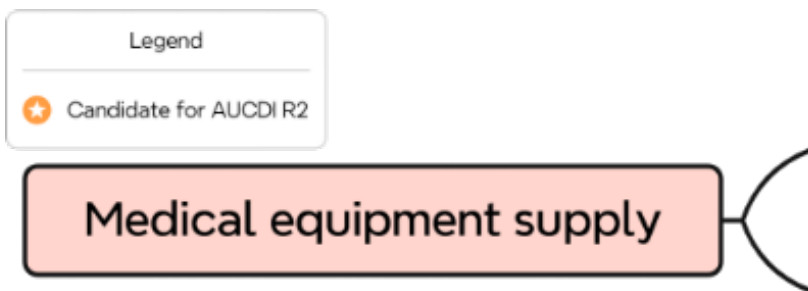

69

Do you have feedback on the new data group, Medical equipment supply? \*

Legend

★ Candidate for AUCDI R2

Medical equipment supply

Yes

No

70

Data element: Equipment type

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

71

Data element: Description

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

72

Data element: Date/time supplied

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

73

### General feedback on new data group, Medical equipment supply

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

74

Overall recommendation: Medical equipment supply data group \*

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

75

Do you have feedback on the new data group,  
Psychosocial therapy? \*

Yes

No

76

Data element: Therapy type

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

77

Data element: Description

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

78

Data element: Date/time provided

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

79

### General feedback on new data group, Psychosocial therapy

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

80

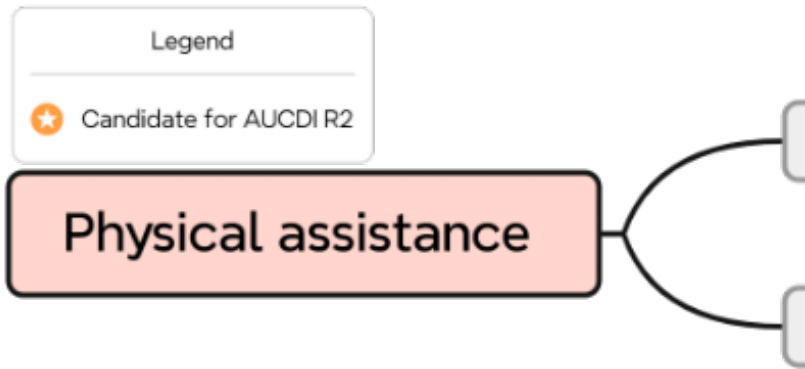

## Overall recommendation: Psychosocial therapy data group

\*

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

81

Do you have feedback on the new data group, Physical assistance? \*

Yes

No

82

Data element: Assistance type

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

83

Data element: Description

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

84

Data element: Date/time provided

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

85

## General feedback on new data group, Physical assistance

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

86

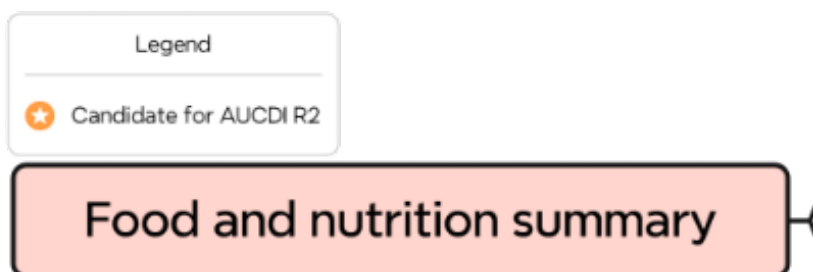

## Overall recommendation: Physical assistance data group \*

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

## Social Determinants of Health (SDOH)

87

Do you have feedback on the new data group, Food and nutrition summary? \*

Yes

No

88

Data element: Overview

Please only provide response if there is an issue, question or comment that needs to be considered or addressed

89

## General feedback on new data group, Education summary

Please include comments around

- Completeness and/or any missing elements
- General design issues of this data group
- Overall comments

125

## Overall recommendation: Education summary data group \*

- Accept - if you have no suggestions for further improvement and consider the data group ready for publication without further review or if the suggested changes are trivial (e.g. spelling)
- Minor revision - if you consider that there are only small changes required to make the data group ready for publication
- Major revision - if you consider the data group needs large or significant modifications such as addition/removal of data elements
- Reject - if you consider the data group is not suitable for publication - for example that it is "unfit for purpose" or fundamentally flawed.
- Abstain - if you feel you need to deliberately refrain from participating in the recommendation process - we encourage you to contribute from your unique point of view as the collaborative review process is intended to be inclusive of all points of view and not requiring specific skill sets or professional background

## Feedback on AUCDI R2 Chronic condition management component

126

Do you have any other general comments or feedback on AUCDI R2 Chronic condition management component? \*

Yes

No

127

Please provide your general comments or feedback on AUCDI R2 Chronic Condition Management component

128

Any other feedback?

## Thank you for your feedback!

All feedback will be collated and addressed before the document is published in mid 2025. We may contact you for further clarification and information when processing the feedback.

Your feedback is essential to this collaborative community process, and we appreciate the communities time, expertise, passion, resources and energy that has been kindly contributed to make this program successful.
